

STRUCTURAL BUILDING & STEEL FRAMING COMPONENTS WITH BRADBURY'S QTR™ & AM400™

- Close Coupled Pre-Punch, Pre-Cut Shear Eliminates Need for Looping Pit / Reduces Overall Footprint
- Tight Line Operation Decreases Time Required for Coil Re-Wrap and Thread-Up at Changeover
- Automated Camber Correction - Eliminates Operator Intervention of Coil Inspection / Increases Throughput and Reduces Coil Handling for Rejecting Coils
- Rotary Pre-Punch and Rotary Pre-cut Shear Provides Increased Throughput
- Automated Profile Changeover Reduces Setup Time, Increasing Uptime and Production

AM400™ Shown
