5 POSITION CUT-OFF UNIT

The **5 Position Cut-Off** *notches the male and female roll-formed edges* of wall panel skin and simultaneously *cuts and forms a safety edge* on the steel skin using specially developed **cutting anvils** – all in a continuous movement and without altering the line speed. The name of the unit refers to the number of different cut patterns the unit can execute.

KEY FEATURES OF THE HILLENG 5 POSITION CUT-OFF UNIT

- Cut-Off is PLC controlled and linkable to the Main Press console.
- Easy touch-screen entry of all batch and cutting parameters.
- Unit precisely follows programmed data in automatic mode.
- Set program for straight cuts, offset/stepped cuts, or *thermal* cuts.

Cut Types

Consult your Hilleng representative for the 5 Position Cut-Off Unit configuration suited to your requirements.
