

HILLENG

INTERNATIONAL

MINERAL WOOL LOADER

The Hilleng Mineral Wool Loader is designed to load mineral wool sheets from a pallet onto the pusher table, which feeds the mineral wool sheet into the Main Press of the Hilleng Continuous Insulating Panel Laminating System.

STEP-BY-STEP PROCESS

- Forklift operator positions pallet of mineral wool onto the unit's floor conveyor.
- Floor conveyor moves pallet under the lifting head.
- Lifting head lowers, activates specially designed pick-up *needles*.
- Head grabs single mineral wool sheet, transports it to pusher table.
- Pusher table feeds sheet into the Main Press.
- Alarm alerts forklift operator to load the next pallet when stack runs low.

Consult your Hilleng representative for the Mineral Wool Loader configuration suited to your requirements.
