

THE BRADBURY GROUP

COIL PROCESSING LINES & EQUIPMENT

Slitting Lines - Bradbury Group enhanced slitting lines include technological advancements that deliver top performance for your service center. Features include coil storage, deburring roller, automatic loop control, double loop system, mobile tensors, corrective tensor-flattener, off-line strapping system, automatic coil loading, automatic threader, high-precision circular shears, automatic tooling change, robotic tooling and separator setup, and more.

Cut-to-Length Lines - Bradbury Group Cut-to-Length lines focus on your production and throughput requirements. From the Bradbury e•Drive³ Thrive® Leveler to our continuous stacking with our Flying Shear or Rotary Shear with multiple stacking solutions, we will meet your production requirements. Automatic banding reduces labor and provides a consistent product for your customer. Other features include de-banding, auto coil loading, threading, and the Flat Trak® CL Strip evaluation system that automatically adjusts the Bradbury Leveler to maintain a flat strip.

Leveltek Stretch Levelers - Athader has a strategic agreement with Leveltek International for the worldwide supply of stretch leveling cut-to-length lines. Production lines have automatic coil loading and threading, a pre-leveler for crossbow and coil set correction, a brushing system for scale and dust removal, Leveltek proprietary non-marking grips, flying shear, robotic and highly automated sheet bundle storage system, and Athader's Matrix software. We are ready to work with you to provide a Stretch Leveler in your existing line!

Strapping & Packaging Lines - Bradbury Group will custom engineer automated packaging solutions to suit your line of operation. We have increased line output by up to 30% with features such as the storage of packs, discharging scrap pieces without manual lifting, pack lifters, wrapping systems, automatic strapping, and more.

Thrive e-Drive® Leveling System - After many years of success with our e-Drive® leveler, our innovation continues with the development of Thrive, our 3-drive precision leveling platform. The Thrive system features increased material stress reduction and makes corrections automatically using laser artificial intelligence technology.

e-Drive® System - Patent #8893537
Flat Trak® CL Monitoring System - Patent #9021844
